EXECUTIVE SUMMARY

Artificial Intelligence and Machine Learning student with hands-on experience in Python, Flask, and the Gemini API. Built end-to-end applications involving NLP, Generative AI, and web-integrated systems. Actively exploring modern AI areas including LLMs, RAG, and Deep Learning.

EXPERIENCE

AI & Machine Learning Developer (Project-Based)

2024 – Present

Academic & Self-Directed Projects

- Delivered end-to-end AI and machine learning solutions across NLP, LLM-based applications, and web-integrated systems using **Python**
- Built an **AI Chatbot** powered by the **Gemini API**, handling **100+ user interactions** through prompt-driven response generation
- Created a **Web ATS Score Checker** that evaluated **50+ resumes**, identifying keyword gaps, strengths, and improvement areas using LLM-based analysis
- Applied NLP preprocessing and structured prompting techniques to generate actionable feedback aligned with ATS requirements
- Architected backend services using **Flask** and integrated lightweight frontends with **HTML, CSS, and JavaScript** for real-time interaction
- Executed data handling, API integration, and evaluation workflows to ensure reliable performance and consistent outputs

EDUCATION

Vishnu Institute of Technology

Bachelor of Technology in AI and Machine Learning; GPA: 9.76

Bhimavaram, AP

2023 – 2027

Narayana Junior College

Intermediate; 97.9%

Jaggaihpetta, AP

2021 – 2023

Ravindra Bharathi School

SSC (10th Standard); 99.7%

Jaggaihpetta, AP

2020 – 2021

PROJECTS

AI Chatbot using Gemini API | Python, Flask, Gemini API, HTML, CSS, JavaScript

2025

- Developed an AI-powered chatbot integrating the **Gemini API** to generate contextual responses for user queries
- Handled **100+ test interactions** with stable response generation through optimized prompt handling and API calls
- Implemented a **Flask-based backend** to manage request routing and API communication efficiently
- Designed a lightweight frontend using **HTML, CSS, and JavaScript** for real-time chat interaction

Web ATS Score Checker | Python, Flask, Gemini API, HTML, CSS, JavaScript

2025

- Created a web-based ATS evaluation tool that analyzes resumes and generates ATS scores using the **Gemini API**
- Processed **50+ resume samples** to identify keyword gaps, strengths, and improvement areas aligned with job descriptions
- Generated structured feedback highlighting pros, cons, and actionable recommendations through LLM-powered analysis
- Implemented a **Flask backend** with a lightweight frontend to enable real-time resume analysis and chatbot-style interaction

Fake Job Detection System | Python, Machine Learning, NLP, Streamlit

2024

- Analyzed and classified 10,000+ job descriptions using NLP-based text vectorization techniques
- Reduced false positives by 15% through refined text preprocessing and feature selection

- Deployed a Streamlit application enabling real-time fraud prediction for user-provided job data

SportsScheduler | *HTML, CSS, JavaScript, Firebase*

2024

- Architected a web-based sports scheduling system to coordinate matches, players, and time slots efficiently
- Integrated Firebase Authentication and Firestore for secure user access and real-time scheduling updates
- Managed real-time scheduling for 50+ events via Firestore listeners and batched updates

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, R, SQL

Machine Learning: Generative AI (Gemini API), LLMs, NLP, Regression, Classification

Libraries & Tools: Pandas, NumPy, Scikit-learn, TF-IDF, Matplotlib

Frameworks: Flask, FastAPI, React, Node.js, Streamlit

Developer Tools: Git, Google Cloud Platform (GCP), Firebase, VS Code
